

CREATING A CLEANER, SAFER, HEALTHIER WORLD.

SOLUTIONS

Food and Beverage Floor Care Solutions

OPTIMAL CLEANING PERFORMANCE TO
ACHIEVE INDUSTRY STANDARDS

- Reduce water usage and labor costs, and save money through innovative cleaning solutions
- Improve your staff's comfort, safety, and productivity with simple, ergonomic controls
- Lower your total cost of ownership with proven reliability and performance of equipment, cleaning technologies, coatings, and service

INCREASE PRODUCTIVITY AND PROFITABILITY

Cleaner, safer, healthier food and beverage facilities are more productive and profitable. The right equipment will help you achieve consistently high levels of workplace safety and employee health. With Tennant technologies, you can:

- Reduce the risk of slip-and-fall injuries with high-traction NSF® certified equipment
- Improve indoor air quality with battery-powered walk-behind and riding machines
- Reduce the use of daily-cleaning floor chemicals with ec-H₂O NanoClean™ technology
- Maintain sanitary tanks with easy-to-clean Hygenic® solution and recovery tanks

Tennant offers a variety of scrubbers, scrubber-sweepers, and sweepers that help protect your people, products and plants. Here is a list of equipment ideal for food and beverage environments:

SCRUBBERS

Deliver predictable results, extend machine life, and reduce cost of ownership with a suite of innovative technologies. Tennant ride-on and walk-behind floor scrubbers provide optimal performance and consistent results on virtually any hard floor surface condition while lowering cleaning costs. Help make your cleaning operation more productive and consistent by choosing from multiple cleaning heads and a variety of optional innovative technologies.

T500e

WALK BEHIND FLOOR SCRUBBER

Reduce costs to clean, increase productivity, and simplify operator training with the T500e's innovative technologies.

5700

WALK-BEHIND FLOOR SCRUBBER

The 5700 heavy-duty scrubber features rugged construction and maintenance-saving features including a breakaway squeegee, large demisting chamber and scrub heads with long-life corrosion resistance.

T12

COMPACT BATTERY-POWERED RIDER SCRUBBER-DRYER

Engineered for easy operation and maintenance, the T12 combines innovative features and substantial power for an effective clean.

T16

BATTERY-POWERED RIDER SCRUBBER

The T16, equipped with Tennant's exclusive scrubbing technologies, is engineered to be up to 20% less expensive to operate and maintain than traditional scrubbing methods based on acquisition cost, consumables, and maintenance.

SWEEPERS

Tennant ride-on sweepers is simple to operate and maintain, maneuver easily in tight spaces are easy to operate. Equipped with SweepMax® Plus, a 3-stage dust filtration technology that removes dust up to 0.3 micron, these sweepers will improve a facility's image for both heavy and light dust applications.

S20

COMPACT MID-SIZED RIDER SWEEPER

Tennant's S20 compact mid-sized rider floor sweeper is a heavy duty machine that maneuvers easily in tight spaces with the sweeping performance of a mid-size sweeper.

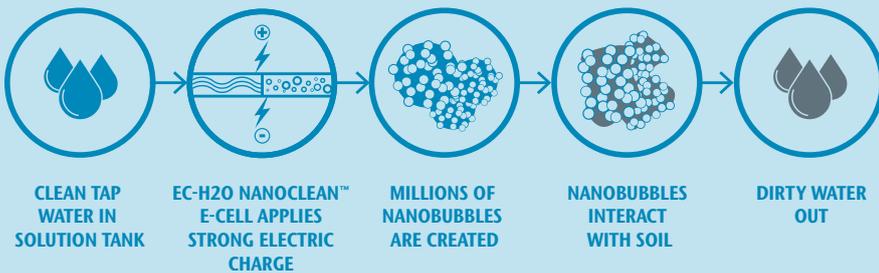

S30

MID-SIZED RIDER SWEEPER

Sweeping with the S30 increases productivity, and provides health and safety benefits. It is simple to operate and maintain, and helps improve a facility's image for both heavy and light dust applications.

By electrically converting water into an innovative cleaning solution, ec-H2O NanoClean™ technology cleans effectively, saves money, increases safety, and reduces environmental impact as compared to daily-cleaning floor chemicals. NFSI certifies that ec-H2O NanoClean™ technology significantly improves floor traction, which can reduce slip-and-fall incidents. NSF registration means that ec-H2O NanoClean™ is safe to use even in food and beverage handling environments.

MORE POWER

ec-H2O NanoClean uses a smart on-board e-cell and applies 3 to 5 times more electric current to product the detergent free cleaning solution.

BETTER RESULTS

This next generation solution offers the same great benefits of the first generation and now cleans better by cleaning more soils in more applications*.

MORE BUBBLES

The additional electric current produces more microscopic bubbles including millions of tiny nanobubbles to promote the cleaning power of the solution, making you less reliant on detergents.

* ec-H2O NanoClean™ technology is not suitable for all soils, including heavy concentrations of fats and oils. Depending on the type of soil, conventional chemical cleaners may be required.
